### Screenshots

#### 1. Home Page

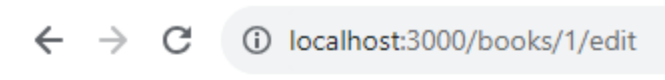

This shows the home page of the app. Each book is listed with a link to show the book which will have functions for updating and deleting the book. There is also a link to create a new book.

#### 2. Add a Book Page

This is the page for adding a new book. It asks to input the title and then click the "Create Book" button. You can also cancel this creation and return back to the home page.

### 3. Update a Book Page

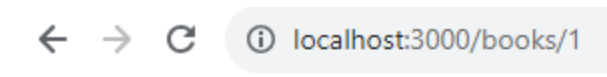

## Editing book

Title

[Show this book](#) | [Back to books](#)

This is the edit page. It allows you to change any of the book entries and then click “Update Book” to save. You can also return to the book details or the home page.

### 4. Show Details Page

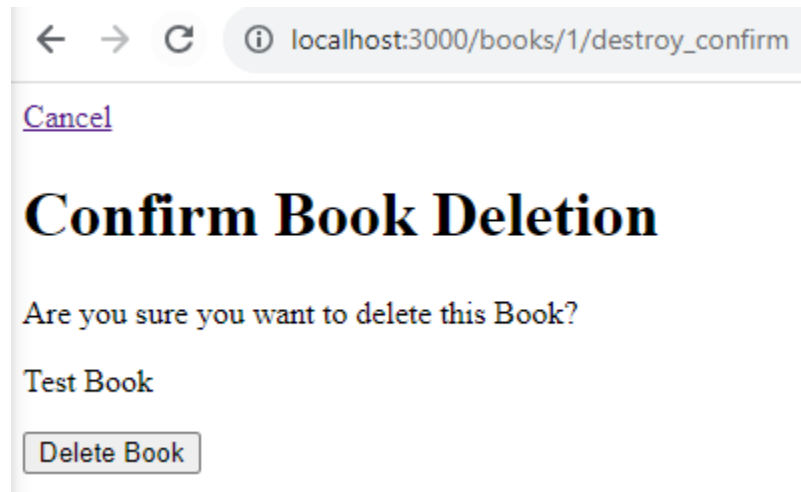

**Title:** Test Book

[Edit this book](#) | [Back to books](#)

This is the details page. It shows the attributes of the book and gives an option to edit or destroy the book. It also includes a link to go back to the home page.

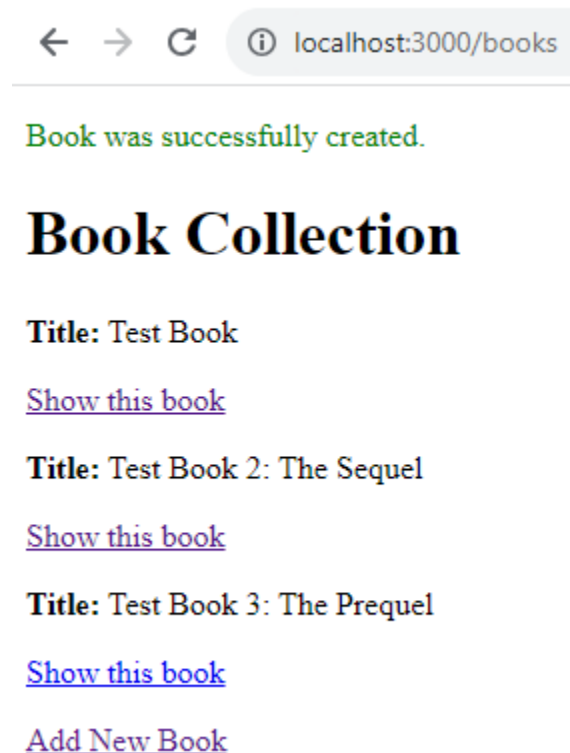

## 5. Delete a Book Page

This is the deletion confirmation page. It asks if you're sure and displays the information of the book and has a button to delete the book. You can also click the cancel link to return to the show details page.
